

# The Best PLANT MINERALS Available

## 75 Colloidal Minerals Contains

**Macrominerals:** Calcium, Carbon, Chloride, Magnesium, Phosphorus, Potassium, Sodium, Sulfur

**Essential Trace Minerals:** Chromium, Cobalt, Copper, Iodine, Iron, Manganese, Molybdenum, Selenium, Zinc

**Ultra Trace Minerals:** Aluminum, Antimony, Arsenic, Barium, Beryllium, Bismuth, Boron, Bromine, Cadmium, Cerium, Cesium, Cobalt, Dysprosium, Erbium, Europium, Fluorine, Gadolinium, Gallium, Germanium, Gold, Hafnium, Holmium, Hydrogen, Indium, Lanthanum, Lead, Lithium, Lutetium, Neodymium, Nickel, Niobium, Nitrogen, Osmium, Oxygen, Palladium, Platinum, Praseodymium, Rhenium, Rhodium, Rubidium, Ruthenium, Samarium, Scandium, Silicon, Silver, Strontium, Tantalum, Tellurium, Terbium, Thallium, Thorium, Thulium, Tin, Titanium, Tungsten, Vanadium, Ytterbium, Yttrium, Zirconium

\*32 day supply (32-1/2 ounce servings)

## Nature's most powerful blend of natural plant derived minerals

**N**ot all colloidal minerals are created equally. Nature's Own® 75 Colloidal Minerals is undoubtedly the purest, most concentrated natural food on earth.

Each quart of Nature's Own® 75 Colloidal Minerals contains a full spectrum of approximately 38,000 mg of 75 plant derived minerals in their unaltered form that are easily utilized by our bodies. These minerals are

“ **...mined from ancient organic plant deposits which grew thousands of years ago...** ”

mined from an organic prehistoric plant material known as humic shale. The humic shale is placed in large food grade vats and submerged in cool, contaminant-free water where it is allowed to leach naturally and undisturbed. During this period, the water soluble plant materials blend with the water to form the concentrate known as 75 Colloidal Minerals and packaged under the Nature's Own® brand.

Nature's Own® 75 Colloidal Minerals are nontoxic, water soluble and from plants, making them more easily assimilated than the smaller number of commonly recognized metallic minerals that come from clay, ancient sea beds like the Salt Lakes, or ground up rocks and soil. These 75

minerals seem out of proportion when you realize that our fruits, vegetables and grains of today contain an average of no more than 15 to 20 minerals. This is why the synergistic combination of our 75 plant derived minerals play an important role in providing the essential minerals our bodies are missing from poor eating habits and depleted foods.

Minerals initiate, regulate and control every organ and function in our bodies. Minerals are the catalysts that support enzyme function, protein digestion, metabolism, cellular electrolyte impulses, and billions of chemical reactions that keep the spark of life going. Don't be fooled by companies that are misleading consumers by selling them Sea salts and Silver products that are metallic minerals. Get the best life has to offer. Try Nature's Own® Plant Source 75 Colloidal Minerals today.
